

Transactive Energy Challenge Kickoff

Workshop: MaCT USA

- **Area of Interest:** TE Transport Management
- **Functionality / Capabilities:** IoT Data Concentrators and Adaptive SD-WAN capabilities, AWS network access that is secure and scale
- **Proposed Scenario:** Provide bridging of various protocols for data sharing and analysis for TE system
- **Impacts/Why:** Demonstrate reliable, scalability and trust with adaptive software defined network capabilities that is technology agnostic and protocol independent
- **Partners Needed:** Partners who have existing data sources to be shared utilizing different protocols, vendor and research organizations
